

Dear Sir/ Madam,

Turnberry Homes is a housebuilder building in the region of 150 to 200 units per year throughout the West Central belt of Scotland.

Our primary architects are Ark with whom we have worked on a number of significant projects over the last six years. The projects have ranged from single house plots to developments of 247 units and have been across a number of local authority areas.

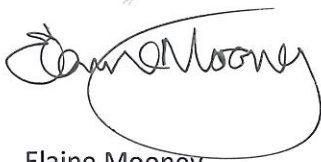

From carrying out our initial sketches for development layout and appraisal through detailed collaboration with planners and other local authority departments Ark have demonstrated the ability to grasp the requirements of each stakeholder in the development process and to translate the differing needs into a cohesive and successful architectural solution.

Ark have worked closely with Turnberry Homes over the years to re-appraise and re-design our portfolio of house types to incorporate revised building regulations and to reflect the demands of a changing market.

On developments where the location and planners have required a bespoke approach we have entrusted Ark with the resultant design and have relied upon their ability to integrate with our engineers, our construction team and our suppliers to ensure that design is both technically sound and economically viable as well as visually pleasing and fitting to our market.

On a personal level we have always found both Tom Walker and Brian Taylor to be extremely professional and would have no hesitation in recommending them.

Yours faithfully,

Elaine Mooney

Director
